Arkus is a Salesforce partner for non-profit that help companies leverage enterprise-class tools without the high risk & large upfront costs of traditional technology solutions. We compliment Arkus by helping them bring their implementations to life more rapidly &

efficiently. We worked with Arkus to create a social network for BirthRight/Arkus using Ionic & Angular. We worked on the backend and frontend development for custom objects, fields & page layouts.

High Tech

Angular,

Apex,

Ionic,

Lightning,

Visulaforce,

SQL

Salesforce Platform,

Community Cloud
